Berwick Campus
The Berwick campus is a dynamic and engaging learning environment that will challenge and prepare you for life beyond graduation.

When you study at the Berwick campus, you get the best of both worlds with an intimate and supportive learning environment teamed with all the benefits of the wider Monash community at your fingertips.

At Berwick, you will be in the company of students who have travelled across the globe to experience a world-class education with just the right balance of academic rigour, theory, practical application and industry experience. You’ll be ready to work thanks to the progressive learning and teaching, opportunities to undertake work placement, collaboration with local businesses, government and industry that the campus is known for.

In 2012 the Berwick campus offers you even more choice with a new suite of hands-on, practical courses in arts, applied media, social sciences, business, education, nursing and health.

A WORLD-CLASS EDUCATION

MONASH UNIVERSITY IS RANKED AMONGST THE TOP 50 UNIVERSITIES IN THE WORLD FOR ARTS AND HUMANITIES, LIFE SCIENCES AND SOCIAL SCIENCES (QS WORLD UNIVERSITY RANKINGS, 2010). A MONASH EDUCATION IS A VALUABLE COMMODITY THAT IS RESPECTED INTERNATIONALLY WITH GRADUATES WORKING ON EVERY CONTINENT AS LEADERS AND INNOVATORS IN THEIR FIELDS.

A SUPPORTIVE LEARNING COMMUNITY

The Berwick campus is renowned for its strong sense of community and outstanding learning support. Your education and student experience will benefit from greater access to academic staff, smaller class sizes, peer assisted learning and comprehensive language and learning support.

Studying at the Berwick campus gives you the best of both worlds. Take advantage of the small and supportive learning environment with all the resources of the wider Monash University network at your fingertips.

You can access the full library collections, studios, theatres, health services, clubs and societies, sports and recreation and research facilities across all Monash campuses.

EFFORTLESS TRANSPORT CONNECTIONS

The campus is located just five minutes walk from the Berwick train station and has a regular shuttle-bus service to Monash University’s Clayton campus.

Students enrolled at other Monash campuses can ride the shuttle buses from Berwick. The shuttle bus also provides wireless access enabling students to study while travelling.

There is also ample parking for students who prefer to drive and secure bike racks for cyclists. Monash promotes car-pooling and offers free and prioritized parking for car pool users.

A GREEN CAMPUS

Monash respects our relationship with the natural environment and its life-sustaining ecosystems.

At Berwick, everyone works together to promote sustainable practices and maintain a green campus committed to renewable energy technology and sustainability.

The Berwick campus is home to the largest solar panel array of any university in Australia. The array, made up of 1529 separate panels provides 12% of campus power usage and saves 200 tonnes of CO₂ emissions each year.

CUTTING-EDGE RESEARCH AND TOP ACADEMICS

The Berwick Campus is home to a young and thriving research community.

Research interests are diverse and span different aspects of building and strengthening communities including talent development and giftedness, education, virtual communities, the media and society, Australian history, viable democracies, volunteerism, regional development, community engagement, social inclusion, public relations, disaster resilience and community safety to name just a few.

The campus hosts the Monash University Unit for Disaster Resilience and Community Safety. Established to support and address inter-professional emergency management education, research and community engagement, the Unit is fast making an important impact in strengthening communities and building their capabilities to prevent and respond to emergencies.

As a Group of Eight, research intensive university, Monash is ideally placed to undertake and deliver outstanding research, teaching and community engagement that benefits both Australian and international communities. The best part is, you get to benefit from our researchers’ experience and expertise as they’re also your lecturers and tutors.

INDUSTRY EXPERIENCE TO PREPARE YOU FOR LIFE BEYOND GRADUATION

With strong links to industry, business and government, the Berwick campus offers you an industry-driven education with extensive opportunities for professional practice and experience.

Our partnership with the Royal District Nursing Service (RDNS), Department of Human Service (DHS), Department of Health, community Health Services in the region, local government, Berwick Healthcare, Nossal High School, local schools, and local businesses mean that you will be ready to work when you graduate.

You can strengthen your experience by participating in internships programs, practical classes, employment skills and workshops, field trips, community engagement and mentor programs, student-run magazines, radio and TV including clubs and societies.
As Monash University’s newest Australian campus, Berwick has outstanding learning facilities including a state-of-the-art library, high-tech Mac and PC computer labs, modern lecture theatres, nursing labs and a professional sound recording studio.

The campus boasts its own bookshop, a café that features a wide menu catering for all dietary needs, student lounge (with pool table, video games and Oscar’s Bar and Bistro) and a Quiet Room for reflection and prayer.

The sports-minded can work out in the gym or make full use of the cricket nets, soccer pitch, tennis and basketball courts on-site.

**Easy Access to First-Class Services**

Our campus provides students with easy access to a wide range of free first-class support services from highly qualified staff.

Support services include:
- Language and learning skills
- Financial aid
- Accommodation assistance
- International student support
- Counselling
- Chaplaincy
- Family and Children Advice
- Disability liaison and support
- Careers and employment advice
- Monash Sport
- Monash Union of Berwick Students (MUBS)

At Berwick you can also benefit from the support of your peers. The Monash Union of Berwick Students (MUBS) is on campus to make sure that you have a great experience at university.

Some of the ways that MUBS can support you are:
- Help you get to know your classmates better with activities and social events
- Give you the opportunity to follow your passions outside of the classroom by joining one of the many recreational or professional clubs and societies on campus
- Student advocacy and support
- Peer support
- Provide additional assistance to international students through Berwick International Student Association (BiSA)

**Contemporary Facilities**

You can immerse yourself in university life by living on campus.

There are three different accommodation styles available at Berwick:
- **Self-contained residential units** each accommodating up to five residents who share a kitchen, lounge area, bathroom and toilet facilities
- **Halls of residence** containing single bedrooms with private bathrooms and shared access to kitchen and dining facilities
- **Self-contained apartments** where students have their own bedroom but share the kitchen, lounge, bathroom and toilet facilities with three other students

For more information about on-campus accommodation visit www.mrs.monash.edu.au/on-campus/berwick/

**Berwick Healthcare**

Berwick Healthcare provides important on-campus health care services for students, staff and the community.

Services include:
- General practice
- Nursing
- Allied Health (Psychologist, Dietitian, Physiotherapist and more)
- Pathology
- Teaching for health professions
- Community education and Health Promotion

The clinic is also a major teaching practice for GP registrars and enables nursing, medicine, physiotherapy, occupational therapy and social work students to work together to improve their understanding of a range of chronic diseases and their clinical application.
Monash believes strongly in social justice. It’s a philosophy we aim to instil in all our students and one which has led to a culture of volunteering that permeates the entire university. Through the ACT program, you will be given the opportunity to volunteer within the University and in the broader community, join leadership programs, and gain first-hand experience through peer-assisted and industry-based learning programs.

The University has developed close links with leading aid organisations such as World Vision and Oxfam, and Monash students have been inspired to start up their own volunteer foundations.

The explore program gives you a truly international experience to help you gain a broader perspective on the world and create personal and professional networks.

Studying overseas as part of your Monash degree will give you a fantastic opportunity to find your place in the global community – whether your future path takes you to further academic studies or into the workplace.
At Monash you will be challenged beyond the confines of a traditional classroom. In the ENHANCE program, you will be introduced to experts and professionals within your chosen field and beyond. You can take part in enrichment and research-based activities that expose you to a range of viewpoints and challenge you in areas such as productivity and innovation, social inclusion, sustainability, and heritage and culture.

You will also be given opportunities to explore your potential as a future leader and learn how to use your skills in leadership and principles of research to address complex issues.

The INVESTIGATE program puts you straight into Monash Research. You’ll learn the principles of discovery and understand what it takes to be truly innovative. If you’re planning a career in research, this program lets you explore which research track best suits you.

For more information about Monash Passport opportunities, see http://www.monash.edu.au/study/options/more/passport.html
Growing up in regional Victoria, Shawn Salerman (pictured) had big dreams of seeing the world and making his mark in the advertising industry.

For the final year business student and budding entrepreneur, study abroad offered the chance to get a global perspective and experience that would help him better understand the world.

“A major factor in coming to study at Monash was that there are many amazing opportunities to study overseas. The United States has some of the best advertising agencies in the world and I really wanted the chance to work and study in that environment.”

Shawn studied at Boston College for one year where he experienced studying in the USA, undertook an internship and got a first-hand glimpse into the life of an American college student.

“Spending a year abroad at Boston College and out of my comfort zone prepared me for the real world because from day one I was independent and making my own decisions. I had a great opportunity to undertake an internship with a major advertising firm in Boston and build important contacts in the industry for when I graduate. I also found out that frat parties are surprisingly much tamer than on TV and movies!”

There are many ways that you can get a global perspective at Monash. One of the easiest ways to gain a broader international view is to spend a semester or two at one of our own campuses in Malaysia and South Africa. Monash also has well-established exchange partner relationships with over 115 universities in 25 countries. You can also undertake a short-term international study program as part of your degree. Programs are offered by all faculties and range in length from two to eight weeks and vary in content from year to year. Examples include group study tours, intensive, in-country language programs, teaching placements for education students, cultural study tours, clinical placements for health and nursing students.

If you want to study overseas, we can support you with travel grants, specialist advisers, support services and an extensive university partner network.

For 3rd year business student, Shamistha Fernando, giving back to the community is an important part of her life.

In fact, she is so focused on making the world a better place that she has the word ‘altruism’ tattooed on her wrist as a daily reminder of her values.

“I grew up admiring the work of the United Nations and have always wanted to work for an organisation that is focused on helping people. I want to use my skills in business and commerce to make a positive impact on the world.”

The Economics and Management student has a particular interest in helping raise the aspirations of young people and regularly mentors students in the Casey, Cardinia and Greater Dandenong regions and volunteers as a Big Sister for Big Brothers, Big Sisters, an organisation focused on providing mentorship and role models for disadvantaged youths.

“I know how hard it can be for kids to grow up feeling alone or lost. I felt that if I could share my own experiences that I might be able to help motivate and inspire other young people to follow their dreams and believe in themselves.

The best thing about going to this campus is that it has strong links to the community and its given me lots of opportunities to start helping people and be part of a team that can really make things happen before I graduate. Earlier this year, I organised a carnival to raise money so that Big Brothers, Big Sisters can mentor more kids in the region – it was really satisfying to see that the money we raised meant that Big Brothers, Big Sisters could host an activity to welcome more mentees into the program.”

Through her commitment to volunteer work and participation in student activities, Shamistha is getting ready for a bright career as a humanitarian and future leader.
“A major factor in coming to study at Monash was that there are many amazing opportunities to study overseas.”

For some students, making the move to university means moving out of home and facing newfound independence.

When Kelvin Wu moved to Australia from his home city of Shanghai to study business and commerce, he chose to live on-campus and benefit from more support and an easier transition moving out of home.

“At first the thought of moving away from home was daunting – who was going to make my dinner, iron my clothes or make sure that the electricity bill got paid? My fear quickly grew to excitement as I realised that I would get to do what I want and make my own decisions.

I wanted to get involved in student life so I moved on-campus to Monash Residential. It gave me a chance to meet new people and make friends quickly.

Essentially, living on-campus helped me adjust to uni and made it a bit easier moving out of home for the first time. There’s a real community feel to living on res with a good balance of study and recreation. We have lots of events during the week like movie nights, games nights and also have monthly suppers. When it’s exam time, everybody studies together and we help each other out.”

Living on-campus offers greater security and support for students and is a smart option for those living out of home for the first time or those who want a rich student experience.

OUR COURSES

FACULTY OF ARTS

AN ARTS DEGREE UNLOCKS THE DOOR TO A LARGE RANGE OF CAREER OPPORTUNITIES. DEPENDING ON WHICH AREAS YOU CHOOSE TO MAJOR IN, THE POSSIBILITIES ARE ENDLESS. OUR GRADUATES FIND WORK IN A WIDE RANGE OF CAREER AREAS INCLUDING PUBLIC RELATIONS, JOURNALISM, COMMUNICATIONS, POLITICS, COMMUNITY DEVELOPMENT AND RESEARCH. IMPORTANTLY, ARTS PROGRAMS HELP YOU DEVELOP A SET OF HIGHLY VALUED “SOFT SKILLS” SUCH AS WRITTEN AND VERBAL COMMUNICATION, CRITICAL ANALYSIS AND TEAMWORK THAT ARE INCREASINGLY SOUGHT AFTER BY EMPLOYERS.

TOP 5 REASONS TO STUDY ARTS AT BERWICK

01 A world-class education in every sense
Monash University is amongst the top 50 ranked universities in the world for arts and humanities and social sciences (QS World University Rankings, 2010). Monash Arts also has extensive opportunities for you to broaden your understanding of the world with study abroad exchange programs, study tours and field trips. The Faculty of Arts also offers programs at the University’s Prato Centre in Italy.

02 Specialised programs taught by top researchers and industry
The Berwick campus is home to a specialised program of arts courses focusing on applied media, film and television studies, the communication industries and social sciences. Monash Arts attracts leading scholars and researchers who are recognised internationally and widely published in their field. The best bit is, they’re also your teachers!

03 Professional recognition
Monash University is the only Group of Eight university to offer accredited public relations major. Students who successfully complete a public relations major sequence in the Bachelor of Professional Communication will be eligible for membership with PRIA (Public Relations Institute of Australia).

04 Your very own student magazine and professional clubs
Monash Berwick students have many opportunities for professional practice to prepare them for life outside the classroom through internship programs, practical classes, student-run magazines, radio and TV, community engagement programs and clubs and societies.

05 Extensive research tools and resources
Monash Berwick students have access to one of the world’s largest collections of online databases with access to 243,838 e-books; 33,991 e-serials and 708 electronic databases.

ARTS DIPLOMA STUDIES

AN ARTS DIPLOMA ALLOWS STUDENTS TO PURSUE AN AREA OF INTEREST IN ONE OF THE HUMANITIES, SOCIAL SCIENCES OR LANGUAGES. DIPLOMAS CAN BE TAKEN WHILE STUDYING A BACHELORS DEGREE. THEY ARE EQUIVALENT TO A FULL MAJOR (48 CREDIT POINTS) AND GENERALLY WILL ADD ONE YEAR TO A MAIN DEGREE. MOST DIPLOMAS ARE ONLY AVAILABLE TO AUSTRALIAN CITIZENS AND PERMANENT RESIDENTS.

Monash university is amongst the top 50 ranked universities in the world for arts and humanities and social sciences (QS World University Rankings, 2010). Passion
for fashion

Lucy Stewart

Bachelor of Business and Commerce / Professional Communication
Premier PR UK, Style Counsellor, Cleo Magazine

With great marks in English and Media Studies, Lucy enrolled in the Bachelor of Business and Commerce/ Bachelor of Communication double degree at Monash Berwick.

“I chose Berwick because it’s a small campus and allowed me more one-on-one time with my lecturers and tutors and it made the transition from school to university a lot less overwhelming. The course gave me the opportunity to take a variety of subjects and didn’t pigeon hole me into one career.

Making the most of her time at Berwick, Lucy wrote fashion and style articles for the campus student magazine Ink, did work experience with Cleo and Home and Away and with the support of her tutors, regularly submitted stories to magazines she hoped to work for. Lucy quickly built an impressive portfolio and had work published in Ink, girl.com.au, Dolly and Cleo – all while she was studying. Lucy is currently working for Melbourne Public Relations and Advertising company Style Counsellor, which represents Target, Mazda, Witchery, Mattel, Novo and more.

WHAT DO PROFESSIONAL COMMUNICATION GRADUATES DO?

Our Bachelor of Professional Communication graduates are in great demand by employers in Australia and overseas.

Our graduates have quickly gained a reputation within the media and communications industries for being creative, multi-skilled and work-ready, with many being offered work while studying.

With a great blend of theory and practical experience, our students are working in a diverse and exciting range of careers such as Account Manager, Advertising Coordinator, Columnist, Critic, Editor, Events Producer/ Manager, Film and Television Producer, Communications Officer, Broadcast Journalist, Print Journalist, Media Adviser, Marketing Coordinator, Project Coordinator, Publicist, Promotions Assistant, Researcher, Web/ New Media Developer, Policy Adviser, Radio or Television Producer and that’s just the beginning!

Visit the Arts Careers Matrix online http://www.arts.monash.edu.au/careers-matrix/ to discover even more career opportunities for applied media graduates.

The Faculty of Education offers courses at Monash Berwick to prepare you for a rewarding career in the education field and beyond.

The Faculty of Education is renowned for providing high-quality teaching and learning. The academic expertise of the faculty is widely acknowledged with many of our lecturers having an outstanding reputation for research in areas such as early childhood education, mathematics and science education, language and literacy education and curriculum and pedagogy. Their expert guidance will ensure that you are ready for a successful career or further study when you graduate.

Leaders in education research

The 2010 Excellence in Research for Australia (ERA) rated the discipline of education at Monash University ‘above world standard’. Education at Monash was ranked first in Victoria and equal first in Australia.

Diverse career opportunities

Monash gives you a wide range of choices if you want to enter the teaching profession, or use your education qualification to further your career outside the classroom.

In addition to teaching, an education degree can offer you many more career opportunities. Qualified educators can work in a wide range of areas including learning and development, community development, health and wellbeing, government and many other public and private organisations. An education degree also offers you opportunities to explore employment overseas.

Put theory into practice

The Faculty of Education recognises the extensive benefits of students obtaining hands-on experience in a professional setting while undertaking their studies.

The professional placement experience provides you with a real-world introduction to a rewarding career in the field of education and a chance to put learning into practice. You will gain valuable guidance from experienced teachers and educators, and develop confidence and skills as a teacher.

Dedicated staff in the faculty’s Partnerships and Professional Placements Office ensure that each student is afforded the opportunity to gain this experience. The office facilitates over 5000 placements each year in a broad range of schools and other settings. Opportunities are available both locally and internationally, as well as in Australia’s rural and remote Indigenous communities. Some highlights include professional placements that take place in the Cook Islands, South Africa and Manigrida, a remote, Indigenous community in Arnhem Land. Students gain a variety of valuable experiences from their professional placements reinforcing the significant value of the program.

Professional recognition

Graduates of Monash University’s education degrees will be recognised for registration with the Victorian Institute of Teaching (VIT). The faculty has a national and international reputation for excellence in teaching and research and produces graduates who lead in professional practice, public debate and policy, and community action around the world.
Teaching is a highly rewarding career, providing an opportunity to engage and inspire young, developing minds.

Teachers work with children across many curriculum areas including literacy, numeracy, science and the creative arts. This specialist qualification covers all aspects of the curriculum, from Prep through to year 10, develops knowledge about child development and is designed to prepare students for fulfilling and flexible career opportunities in the teaching profession.

Course outline
This program covers the essential learning to teach children to develop their creative, physical, personal, intellectual and social capacities, literacy and numeracy skills, in the disciplines of arts, English, mathematics, health and physical education, science, the humanities and information and communication technologies. The program aims to immerse students in teaching and learning theories for primary school aged children, primary school curriculum development and implementation across a range of learning areas. In addition to the primary years, specific units and discipline study areas for teaching Years 7 – 10 are covered. Secondary education studies focus on adolescent learning and the nature of education, classroom teaching and practice in schools, education and its relationship to society and planning, implementation and evaluation of the school curriculum. Students also gain valuable classroom experience by completing professional placements, undertaking a minimum of 80 days of supervised teaching placement in schools.

Career outlook*
Following registration with the VIT, graduates are eligible to teach in Victorian primary schools and in secondary schools in Years 7 – 10. Graduates wishing to teach interstate or overseas are advised to check registration requirements with local authorities.

For further information on the VIT visit www.vit.vic.edu.au.

Course details
Course code: 3750
Intake: Semester 1
Fees: CSP
Duration: Four years full-time
Location: Berwick

VCE prerequisites: Units 1 and 2 – two units (any study combination) of general mathematics or mathematical methods (either) or Units 3 and 4 mathematics (any). Units 3 and 4 – a study score of at least 30 in English (ESL) or 25 in any other English.

IB prerequisites: A score of at least 4 in English SL or 3 in English HL or 5 in English B SL or 4 in English B HL, and a score of at least 3 in any mathematics subject.

Non-Year 12 requirements: Applicants must complete and submit a VTAC Pi form detailing relevant work experience, community involvement and evidence of how they have fulfilled the equivalent of the listed mathematics prerequisite units.

Alternative pathway
Students can enter the Bachelor of Education (P-10) by first completing the Diploma of Tertiary Studies offered by the Faculty of Arts. Applications are lodged through VTAC. For more information on this program, visit: www.arts.monash.edu/samss/dots.

For further information on the Bachelor of Education (P – 10) please visit: edu.monash.edu

*Pending final VIT approval

The Master of Teaching (Secondary) prepares graduates for teaching in secondary schools and provides them with the opportunity to build on strengths developed in their undergraduate degree.

Course outline
The course combines academic studies about foundations of education with units appropriate to the two teaching specialisms you will be qualified to teach. Teaching specialisms are the subjects you will ultimately be qualified to teach in secondary schools, and are based on your previous studies. Generally you must have previously studied that discipline at university level for at least two years, and then complete the education units related to each specialism.

Secondary education studies focus on adolescent learning and the nature of education, classroom teaching and practice in schools, education and its relationship to society and planning, implementation and evaluation of the school curriculum. Students also gain valuable classroom experience by completing professional placements, undertaking a minimum of 60 days of supervised teaching practice in the teaching area of their curriculum specialism.

Career outlook*
Following registration with the VIT, graduates are eligible to teach in Victorian secondary schools. Graduates wishing to teach interstate or overseas are advised to check registration requirements with local authorities.

For further information on the VIT visit www.vit.vic.edu.au

Course details
Course code: 4201
Fees: CSP and Full Fees
Duration: 1.5 years full-time
Location: Berwick
Intake: First semester

Entry requirements: Recognised degree or equivalent diploma from disciplines that qualify for two single teaching specialism subjects (teaching areas) or an approved double specialism. For information on specialism prerequisites please visit: www.education.monash.edu/units/secondary-specialisms.html.

*Pending final VIT approval
The Bachelor of Business blends a strong conceptual theoretical framework with practical applications. Graduates will have a well-developed understanding of multidisciplinary decision-making in organisations and be well equipped for employment in both private and public-sector enterprises.

Course outline
The course structure has three main components: a set of core units which provide an introduction to the key areas of business study; a major study stream on your home campus; and, eight open electives which may be taken from any Faculty of Business and Economics programs and campuses, or from disciplines offered by another faculty. These open electives can form a second major.

At Monash Berwick, students will be able to select a major study stream from Data Visualisation and Modelling, Economics and Finance, International Business and Quantitative Economics.

For a detailed list of areas of study available and up-to-date information, visit www.berwick.monash.edu.au/courses

Course details

VCE prerequisites: Units 3 and 4 – a study score of at least 30 in English (ESL) or 25 in any other English and a study score of at least 25 in mathematics (any).
IB prerequisites: A score of at least 4 in English B SL or 4 in English B HL. A score of at least 4 in mathematics SL, or in further mathematics SL or in mathematical studies; or a score of at least 3 in mathematics HL, or in Maths Case HL.

This double degree course combines business and communication studies. The business degree provides depth and breadth of study in the major business and commerce discipline areas, and the professional communication component equips students with skills and knowledge relevant to a range of communication and media professions.

Course outline
The course comprises: a set of core units that provide an introduction to the key areas of business study; a business major chosen from: accounting, economics, finance and macroeconomics, human resource management, management, marketing, marketing communication, quantitative economics; a minor and second major (12 units total) in professional communication in: communications, journalism or public relations; and business and arts electives.

Career outlook
On completion of this double degree, students will be equipped to work in corporate communications, public relations, journalism, or media communications in private and public enterprises.

Course details
Four years full-time, eight years part-time
VCE prerequisites: Units 1 and 2 – any two units from general mathematics and/or mathematical methods (either). Units 3 and 4 – a study score of at least 30 in English (ESL) or 25 in any other English.
IB prerequisites: A score of at least 4 in English SL or 3 in English HL or 5 in English B SL or 4 in English B HL. A score of at least 4 in mathematics SL, or in further mathematics SL or in mathematical studies; or a score of at least 3 in mathematics HL, or in Maths Case HL.
DATA VISUALISATION AND MODELING

What is it?
This major will provide students with the knowledge and skills necessary to transform complex business data into compelling and easily accessible graphs, charts and simulations that are powerful aids to corporate, government and consumer decision making.

Career opportunities
This major works especially well in conjunction with majors in accounting, finance, economics, econometrics, management or marketing. Graduates will be able to apply the tools acquired to most business careers.

ECONOMICS AND FINANCE

What is it?
This interdisciplinary field of study addresses issues of how financial markets impact on the economy, and how this is important for business and public policy decision making.

Career opportunities
Graduates may work in corporate and international banking or finance, economic consultancy, or in the area of policy advice.

INTERNATIONAL BUSINESS

What is it?
International business covers all business transactions involving participants from two or more countries. It is a field of management and concerns the special features of transnational business including movement of goods, services, capital, personnel, information and technology.

Career opportunities
Graduates may work in areas such as import/ export, international marketing, tourism and hospitality, international logistics, or banking, to name just a few.

QUANTITATIVE ECONOMICS

What is it?
This interdisciplinary field of study combines economics with business statistics and econometrics. Quantitative analysis is an increasingly important aspect of contemporary business practice.

Career opportunities
Graduates will be able to apply principles of economics and statistical methods to decision making in areas of business and public policy.
ADD A SECOND MAJOR FROM OUR CAULFIELD OR PENINSULA CAMPUSES AND DOUBLE YOUR STUDENT EXPERIENCE AND BUSINESS KNOW-HOW.

YOU'LL GET TO DOUBLE YOUR BUSINESS EXPERTISE WHILE YOU ENJOY THE UNIQUE STUDENT EXPERIENCE STUDYING AT MULTIPLE MONASH CAMPUSES.

COMPLEMENT YOUR SPECIALIST STUDIES WITH ONE OF THE FOLLOWING MAJORS OFFERED AT CAULFIELD: ACCOUNTING, BANKING AND FINANCE, BUSINESS LAW, ECONOMETRICS, ECONOMICS, HUMAN RESOURCE MANAGEMENT, MARKETING, PSYCHOLOGY AND MAJORS OFFERED AT PENINSULA: SPORT MANAGEMENT AND TOURISM.

WHAT ARE OUR BUSINESS GRADUATES DOING?

With great internship and work experience programs, partnerships with local government and businesses, and studies focused on building practical skills, our graduates are well equipped to enter the workplace successfully.

Employers have high expectations of Berwick business graduates thanks to the impressive performances of our past students. Berwick graduates can be found working in tourism, marketing, advertising, human resource management, finance, consulting, management, public relations, and politics. Whether forming their own businesses, working as consultants or finding employment in local businesses or multinational organisations, our students are making their mark in the business world.
You’re hired! Strengthening your degree with workplace learning: Stephanie Rep

Bachelor of Business and Commerce / Bachelor of Professional Communication

When Stephanie Rep was offered the chance to work as a Marketing Assistant with multi-national company PZ Cussons as part of her coursework, she jumped at the chance.

Stephanie, a marketing major, is just one of the many business and commerce students strengthening their studies in the classroom with practice in the industry to improve their graduate employability.

The Work-integrated-learning Program (WIL) allows students to develop work skills and gain a valuable insight into the business environment as part of their coursework.

“The internship helped me to apply theory to real-life business practices. I could see where my university studies fit in the workplace and was able to develop my negotiation and critical thinking skills with the experience,”

Working closely with her mentor and colleagues at PZ Cussons has proved invaluable for Stephanie’s transition from University to work at the end of the year.

“As a finale to the work placement, I was asked by senior management to prepare a presentation of my findings and recommendations. It was rewarding to have a sense of appreciation and recognition for the effort I had put in. It has given me lots of confidence to pursue a career in business.”

Partnerships with local, national and multi-national businesses form an important part of the highly practical and industry-driven course offered at the campus.

The Work-integrated-learning (WIL) Program pairs businesses with high performing third-year students to put their studies in the classroom into practice thereby strengthening their employability skills and transition to the workplace on graduation.
Health promotion is a multidisciplinary field of study which includes aspects from disciplines such as sociology, political science and psychology.

The Bachelor of Health Promotion degree equips students with skills, including project management and population health program planning and evaluation, along with those skills required for community development roles. Graduates are provided with opportunities to learn through practice via placements in local health and community services, ensuring work readiness.

Course outline
Students will undertake core units in which they learn about the determinants of health, health promotion program planning and evaluation and project management as well as biological bases of disease, research and critical thinking, health care systems, health, culture and society, health policy and politics. They will also gain knowledge of different cultures, contexts and settings in which policy, program and prevention strategies are developed and implemented and learn to grapple with a range of issues as they apply to health promotion practice. These include organisational partnerships, community engagement, ethical issues, the importance of self-reflexivity, the synthesis and application of evidence, the research/practice nexus and the important role of advocacy in promoting improved health and wellbeing outcomes. All graduates will be equipped with scientific understandings requisite to postgraduate studies in health promotion, public health, allied health, and honours and higher research degrees.

Career outlook
Graduates move into a broad range of career pathways within public health contexts locally, nationally and globally. Graduates will likely be considered for project management, junior level management positions, as well as positions in community health and government, especially local government. Graduates will also be equipped for international careers in a range of government and non-government contexts.

Course details
Three years full-time, six years part-time
Berwick campus
VCE prerequisites:
Units 3 and 4 – a study score of at least 30 in English (ESL) or 25 in any other English.

Extra requirements
Police check: Students must hold a National Police Records Check before undertaking field work placements.
Working with Children Check: Students must hold a Working with Children Check before undertaking field work placements.

Failure to hold satisfactory checks may result in student being unable to complete the course.

This course, offered by the School of Nursing and Midwifery, prepares nurses for general and specialist practice roles in a range of clinical areas.

The course enables development of advanced practice roles such as leadership skills to plan, implement, coordinate and evaluate health care, as well as the ability to formulate policy for a diverse and multicultural society. Graduates are employed in a wide range of general and specialist clinical, educational and health care environments in senior positions and contribute to the health of individuals, families and communities, in addition to the development of the profession.

Course details
Course Code: 1250
Duration: 1.5 years full-time, 3 years part-time
Email: nursing.enquiries@med.monash.edu
Website: http://www.med.monash.edu.au/nursing/postgraduate/
The Bachelor of Nursing (Community Health) provides a broad educational foundation for general nursing practice with a focus on the delivery of care in the community. Students will gain hands-on clinical experience in traditional health care setting such as hospitals as well as community health centres.

Graduates will be skilled in the delivery of holistic health care and be able to apply an extensive body of knowledge from relevant disciplines in varied practice settings across both community and hospitals. Students are expected to develop the skill of critical analysis in relation to the theory and practice of nursing, and also develop skills according to accepted standards of nursing practice.

**Course outline**
The course consists of six semesters. Clinical nursing experience will be undertaken in years 1-3 and will comprise approximately 50% of the course with placement in a variety of health care settings. Students will undertake major studies in Behavioural science, Biosciences, Clinical studies, Community Health, Health Promotion, and Nursing. The areas covered in the curriculum meet currently accepted standards of nursing practice as set down in the Australian Nursing and Midwifery Accreditation Council (ANMAC) National Competencies for the Registered Nurse.

**Career outlook**
The course provides a broad educational foundation for nursing practice and pathways. Graduates will be eligible to be Registered Nurses (Division 1) with Nursing and Midwifery Board of Australia (subject to ANMAC approval).

Graduates will be able to provide holistic nursing care as a first-level practitioner in community and health care settings compatible with the broad health care needs and goals of Australia’s multi-cultural society.

**Course details**
Three years full-time, equivalent six part-time

Berwick campus

VCE prerequisites: Units 1 and 2—general mathematics or mathematical methods (either), or Units 3 and 4—mathematics (any). Units 3 and 4 – a study score of at least 30 in English (ESL) or 25 in any other English.

**Extra requirements:**
Police check: Students must complete a National Police Records Check before undertaking clinical placements.

Working With Children Check: Students must hold a Working With Children Check before undertaking clinical placements.

Failure to hold satisfactory checks may result in students being unable to complete this course.

Immunisation policy: Students must comply with the Monash University School of Nursing and Midwifery Immunisation Policy (see www.med.monash.edu.au/nursing/current.html).

**Please note:** Course subject to final professional accreditation
**THE COMMUNITY HEALTH SPECIALISATION AT BERWICK: NURSING IN THE HOSPITAL AND BEYOND**

Nursing is an exciting and rewarding career with an extensive range of career paths available to graduates.

While nurses have traditionally worked in hospitals, research and education, the need for health care professionals in the community has never been greater. As Australia faces an aging population and a growing number of people living with chronic illnesses such as diabetes and asthma, there is a new focus on prevention and management of illness outside the hospital creating exciting opportunities for nurses to practice in the community.

Professional nursing organisations such as the Royal College of Nursing Australia have identified the need for a course that provides nurses with the skills and knowledge to provide health care in both hospitals and community contexts.

The Bachelor of Nursing (Community Health) has been developed to meet this need. Not only will you be qualified to practice as a Division 1 Registered Nurse in traditional health care settings such as hospitals and learn the fundamentals of clinical nursing practice, you will develop expert knowledge in providing community-based care including health promotion and education, early intervention and referral, treatment and management of chronic disease and post-hospital care.

Community-based nursing is challenging, diverse and offers you the chance to make a direct positive impact in the lives of people in your community. Community-based nurses work in health care centres, general practice, Royal District Nursing Service, schools, universities, local councils and in patients’ homes. They work in local clinics to monitor health status, provide education in self-management, and liaise with specialists and support groups and work in schools and local councils to provide education about sex, drug and alcohol use, obesity and other lifestyle concerns.

As a nursing student at Berwick you will spend about 50 per cent of the course on clinical placement, in hospitals as well as community settings such as general practice and health care centres. You’ll also attend lectures, tutorials and practice your clinical skills in nursing laboratories all preparing you for a rewarding career in all facets of nursing.

---

**BACHELOR OF SOCIAL WELFARE**

The Bachelor Social Welfare is a degree that enables students to specialize in one of two areas of study: child welfare or aged care.

Students will develop the necessary skills, theoretical knowledge and values to work effectively in these respective fields of practice and to promote change at personal, group, community, organisational and political levels.

**Course outline**

Students will undertake studies in the areas of society, human structure and function, foundations of welfare work, research and evaluation. Students will complete a major in one of two areas, Aged Care or Child Welfare. The areas covered in the curriculum meet Australian Institute of Welfare and Community Workers (AIWCW) accreditation requirements, including 400 hours of supervised professional practice.

**Career outlook**

Graduates will be able to practice as professional social welfare workers in a range of human service fields, including interpersonal counselling, research and policy, casework and case management and management of human service organisations.

**Course details**

Three years full-time, six years part-time

Berwick campus

VCE prerequisites: Units 3 and 4 – a study score of at least 30 in English (ESL) or 25 in any other English.

**Extra requirements:**

Successful applicants must hold a National Police Records Check before undertaking fieldwork placements. Students must also hold a Working with Children Check before undertaking fieldwork placements.

**Please note:** Course subject to final professional accreditation

**Spotlight on:**

**Social Welfare**

A career in social welfare is diverse, challenging and very rewarding.

Social welfare workers are in high demand and there is a broad array of opportunities for graduates in the area of direct service delivery, in particular child protection and aged care. Typically new graduates move into case management and casework type positions that entail working directly with individual clients, families and communities. However, there are longer term career development pathways that offer opportunities in supervisory positions, middle and senior management positions and policy development positions.
Honours is an additional year of study that follows the completion of your Bachelor degree.

It is a challenging and highly satisfying year allowing you to conduct specialised research and advanced work in an area that interests you. On completion of your studies, you will qualify for an undergraduate degree with honours and your employment opportunities will be enhanced. This is because employers appreciate an honours degree as an indication of additional skills, knowledge and achievement.

Course outline
Students choose a research topic and work under the guidance of an academic supervisor who specialises in this area.

Career outlook
On completion of your studies, you will qualify for an undergraduate degree with honours and your employment opportunities will be greatly enhanced.

Course details
One year full-time, two years part-time. Contact your faculty for further admission and course details.

Monash University performs innovative research in a range of discipline areas producing research outcomes that have a significant impact on the community.

Undertaking research at Monash provides candidates with access to generous merit based scholarships, grants and funding opportunities as well as first-class academic and technical expertise to enrich the research experience.

All faculties at the Berwick Campus offer research programs including PhDs and Masters by research.

Research degrees are available to appropriately qualified students who have suitable undergraduate qualifications.

Students with prior research experience such as an Honours degree or a Masters degree with a research component may be eligible for direct entry to doctoral level programs.

For further information, contact the faculty directly.
The Diploma of Tertiary Studies (DoTS) is an entry pathway that provides access to a range of Monash University degrees.

It’s ideal for students who didn’t receive the ATAR they expected or are looking for additional study skills and support when returning to study. Each semester, you study three units from your chosen course combined with a fourth unit focused on effective university study skills. Successful completion of the DoTS course allows you to apply for the second year of your Monash degree. You may be eligible for up to one-year credit depending upon the units you select and degree you enter.

What to expect
The Diploma of Tertiary Studies provides:
- Six units from your degree of interest studied at the Berwick campus.
- Two units that equip you with essay writing, researching, problem solving, critical thinking, project development and communication skills.

Advantages
- You’re enrolled as a Monash University student!
- You begin studying in your chosen field from day one
- You receive additional study support
- You study on-campus and enjoy the same outstanding student experience, resources and opportunities as other Monash University students
- DoTS gives you the opportunity to explore academic options if you are uncertain about future career directions
- You may be eligible for up to one year credit towards your degree

Credit
Successful completion of The Diploma of Tertiary Studies counts as a complete or partial first year of study towards a degree. Students who are successful in gaining a place in a degree after completion of the Diploma of Tertiary Studies will be eligible to receive up to 8 units of credit, which is equivalent to one year of full-time study.

Subject areas available at Berwick
- Arts, applied media and social science
- Business
- Education
- Health
- Nursing
- Social Welfare

Web: www.arts.monash.edu.au/samss/
Monash University and Chisholm Institute of TAFE have joined together to make articulation between TAFE and university study easier for you.

This partnership means you will have greater flexibility to use credit points from your TAFE diploma towards your university-level qualification. To find out more about the credit and entry arrangements in place for your course, please contact the Faculty Admissions Office. Contact details are listed at the end of this guide.

Studying at TAFE or a polytechnic institute before university gives you vocational training in your chosen subject area and provides you with practical skills that relate directly with current industry needs.

A TAFE or polytechnic qualification increases your chances of being accepted at university and you may be awarded credit towards your degree. This will reduce both the time and fees associated with studying at university.

Joining the DoTS to Success:
Kristy McRae

Diploma of Tertiary Studies (Arts)

Former Scoresby Secondary College student, Kristy McRae (pictured), remembers only too well how anxious she was to get her VCE results. She realised half way through the year that she hadn’t really considered how much she needed to invest in her studies to achieve the ATAR for her dream course in arts and social work at Monash University.

“At the start of the year I didn’t have a clear goal, I wasn’t sure what I wanted to do so I lacked motivation and didn’t put in as much effort as I should have.”

With the support and recommendation of her school Careers Adviser, Kristy applied for the Diploma of Tertiary Studies (DoTS) so that she could still start her studies at Monash and get the extra study support she needed. A one-year program, DoTS provided Kristy with a second chance to study her dream course with additional study and transition support.

“DoTS is a great learning environment because everyone is on the same page. The extra support is brilliant and I can truly say that I have taken a lot away from studying the course. I’ve learnt to change my study habits and I’m really focused on my goals. My lecturers have shown me that anything is possible if you’re willing to put in the effort and it has made a real difference to my performance.”
PARENTS GUIDE

IT’S A TEAM EFFORT.

THE FINAL YEAR OF HIGH SCHOOL IS AN EXCITING TIME FOR STUDENTS AND THEIR SUPPORT TEAM. AS A PARENT, GUARDIAN OR FRIEND, YOU PLAY A VITAL ROLE HELPING STUDENTS TO UNDERSTAND AND EXPLORE THEIR OPTIONS AS MAKE IMPORTANT DECISIONS ABOUT THEIR EDUCATIONAL FUTURE AND BEYOND.

WHY KEEP STUDYING? THE BENEFITS OF A UNIVERSITY EDUCATION

In an era when skilled employees are sought after, a University education will provide your child with the best opportunity for success and professional fulfilment.

Tertiary qualifications will allow your child to thrive within a competitive job market and give them greater benefits within the workplace and society.

Monash University education delivers:

- Better employment prospects and increased flexibility
- Higher starting salaries for graduates
- Professional qualifications recognised and respected worldwide
- Options for career development through postgraduate study

SCHOLARSHIPS: SOMETIMES AMBITION NEEDS A HELPING HAND

Monash University commits more than $90 million a year to student scholarships, prizes and awards.

$10 million is awarded annually to coursework scholarships and bursaries to encourage and reward academic excellence and to ensure equitable access to a world-class education. In 2011, the university will award more than 1000 new coursework scholarships to undergraduate students.

There are three broad categories for which they are awarded: academic merit, equity grounds or a combination of both.

For more information about scholarships please visit www.monash.edu/scholarships.

COSTS AND FEES INFORMATION

Fees will differ depending on the course and the type of place offered, as well as whether the student is a domestic or international student.

Domestic students enrolling in an undergraduate place at Monash will be offered a Commonwealth supported place (CSP). Students can choose whether to;

01 defer the payment via the HECS-HELP scheme or
02 pay all or some of their contribution upfront before the census date for that period of enrolment and receive a discount.

All international students are required to pay full-fees to study at Monash.

For more information on fees please visit: www.monash.edu/fees

UNIVERSITY LIFE, NETWORKS, AND DIVERSE KNOWLEDGE

Learn how to discover and be inspired to achieve

- Exposure to new and varied thought processes, intellectual challenges and experiences in an introduction to lifelong learning and greater achievement.
- Universities are diverse learning communities, with people from a wide range of backgrounds and experiences, and international students who provide different perspectives, cultural input and worldwide networks.
- While at uni students will experience new ways of thinking and increased independence – this is an exciting time for students and parents.

Of course this comes with other changes, which may include your child committing to part-time work, moving out of home and adapting to various new experiences. Your role as a parent or friend will be important and you can be a great support by being familiar with the services available (listed above) and encouraging students to seek help if they feel they need assistance.
